Artis Energy Solutions

Industry Expertise
+
Comprehensive Solutions

Artis Energy Solutions analyzes building and operations data to identify, prioritize, and install customized solutions that address the key energy cost drivers.

Operational Improvements

Based on financial objectives and existing infrastructure, we work closely with our customers to propose solutions crafted for their facilities. This results in an increase in energy efficiency through energy reduction and demand management strategies, and an overall improvement in staff productivity and comfort.

Energy Efficiency & Reduced Costs

We analyze utility data and work with our customers to identify their baseline energy usage, then provide solutions and strategies to reduce costs, along with options for monitoring and analytics solutions to provide further insight into unnecessary energy costs.

Our Clients

Portfolio of Energy Solutions

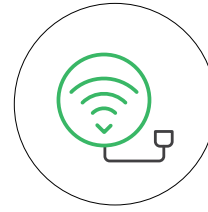

LED Lighting and Control Systems

- Energy savings up to 40%
- Reduce maintenance costs
- Minimal lumen depreciation/optimal lumen disbursement
- Increase productivity and safety
- Turnkey installation

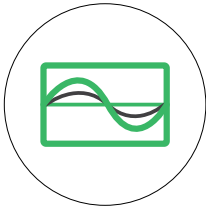

High-Efficiency HVAC Solutions and Refrigeration Solutions

- Energy savings up to 35%
- More efficient and quieter operation
- Reduce maintenance and operating costs

Wireless Energy Management Systems

- Building energy savings up to 20%
- Real-time and historical control and monitoring
- Centralized control and scheduling
- Internet-enabled to support
- Non-intrusive installation
- Load scheduling and sequencing
- Advanced scheduling

Power Factor Correction

- Improve electric efficiency
- Mitigate reactive power fees
- Improve inductive equipment life
- Increase electrical capacity

Compressed Air Solutions

- Energy savings of up to 60%
- Match compressor size to load for maximum efficiency
- Optimize compressor motor speed
- Improve reliability, operations and maintenance
- Maximum cost savings/lowest lifecycle costs

Variable Frequency Drives

- Energy savings up to 50%
- Match equipment speed to actual load requirements
- Lower demand charges/extend equipment life
- Reduce maintenance costs

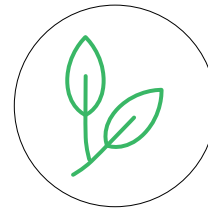

RTIS® Real-Time Energy Analytics Software

- Real-Time Equipment Monitoring and Analytics
- Historical Performance Trending and Analytics
- Improved Transparency and Optimization of Energy Costs
- Identification of Operational Process Improvements
- Equipment Performance Anomaly Detection
- Fuel-Mix Specific GHG Reporting for Enhanced Sustainability Reporting
- Integration with BMS/EMS systems for Automated Control Capability

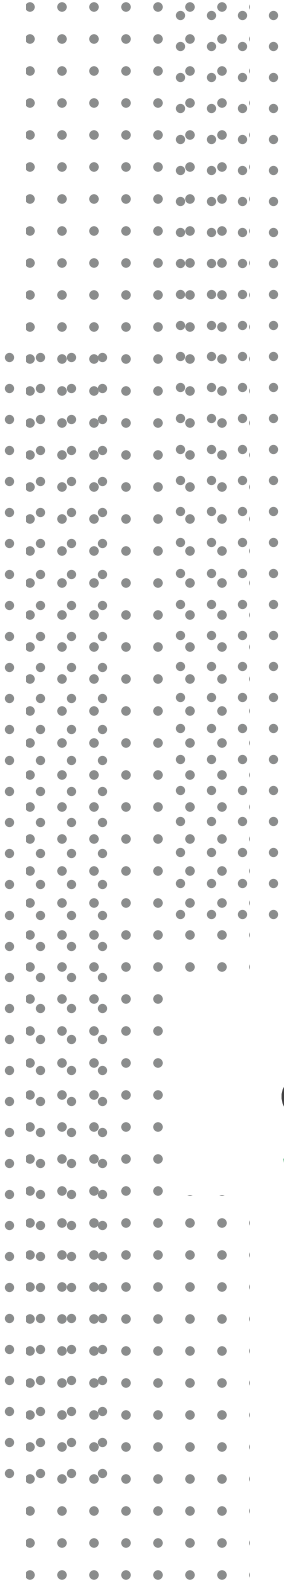

Utility Incentives, Financing Options and Energy Procurement

- C-Pace Financing
- On-Bill, No or Low Interest Equipment Financing
- Utility Energy Efficiency Measure Incentive Management
- Wide Array of Fixed or Variable-Rate Energy Procurement Solutions

Billing Analysis and Sustainability Consulting

- Billing Verification
- Company Process Review
- Load Profile Analysis
- On-Site Equipment Evaluation
- Sustainability Assessment
- Time of Use Analysis
- Utility Tariffs and Rate Optimization
