artisenergy™
INTELLIGENCE

Artis 6-Step Process

1

Secure utility bills and historical interval load data.

2

Upload billing and load data into RTIS® and perform historical data analytics assessment to identify most easily address-able savings oppor-tunities.

3

Perform a facility audit to evaluate operations and on-site equipment to quantify key aspects of the facility's energy spend.

4

Installation of RTIS®.

5

Using real-time energy data, prepare a prioritized energy management plan that incorporates proposed energy investments and operational process changes.

6

Implementation of plan, including proposed energy investments and operational process changes, ongoing energy monitoring, and evaluation of performance.
