

**RTIS® Platform**

*Listen to your building™*

# Artis Energy Intelligence

Real-time Visibility  
+  
Analytics to Understand  
and Control Your Costs

Our insights save energy, identify operational improvements, analyze investment opportunities, and meet sustainability goals. Our analytics platform, RTIS<sup>®</sup>, provides the business intelligence and awareness needed to transform energy into a competitive advantage.

**SaaS Software**

**Managed Services**

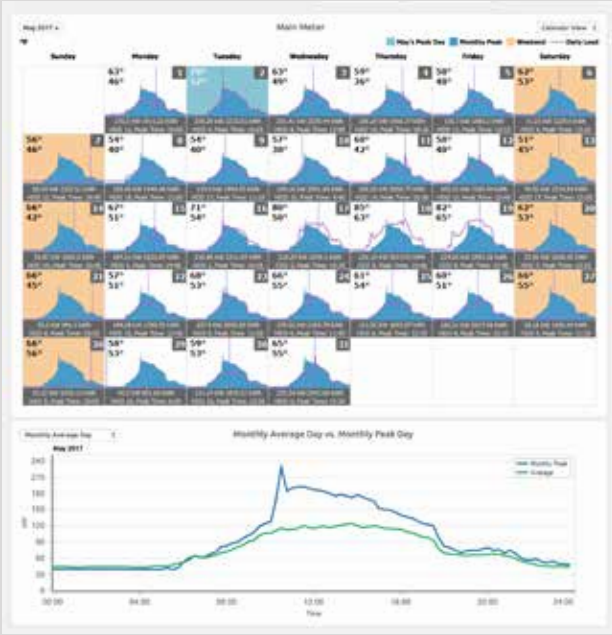

**Consulting**

With our software, managed services, and consulting capabilities, we integrate **smart algorithms** with a support team with the **energy expertise** to deliver powerful and flexible solutions that fit within the organizational constraints and energy savings requirements of our customers.

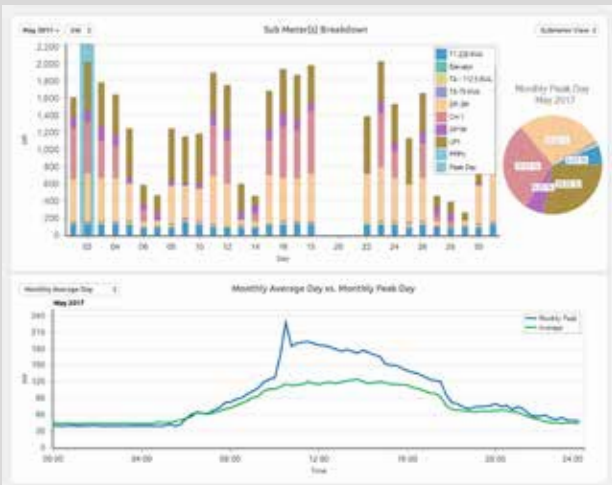

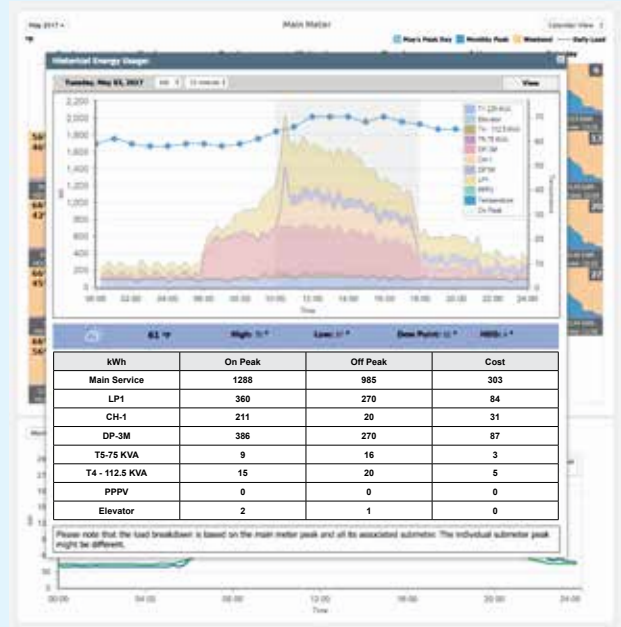

# Energy Cost Transparency & Optimization

Utility bills are opaque and difficult to understand. The RTIS® rate engine provides transparency and reduces costs by analyzing your building's energy usage profile and determining the most attractive rate classes, supply rates, identifying billing errors and applicable tax credits, and tracking utility tariff changes.

# Operational Improvements

Through real-time monitoring and analytics on your critical loads, RTIS® dissects your business processes and building system performance to identify process improvements that reduce costs and improve your company's sustainability.

# Investment Opportunities

RTIS® tracks historical and real-time equipment performance and factors in weather conditions to detect performance anomalies and inefficiencies to identify attractive capital investment opportunities.
